This number line represents the set of whole numbers.

A number line is drawn by choosing a starting position on a line and marking off equal distances from that point.

The arrowhead indicates that the line and the set of numbers continue indefinitely.

Integers

Words: Integers are the negative numbers $-1, -2, -3, -4, \dots$ and whole numbers $0, 1, 2, 3, 4, \dots$

Symbols: $\{\dots, -4, -3, -2, -1, 0, 1, 2, 3, 4, \dots\}$

Model:

Zero is neither negative nor positive.

1 Name the coordinates of A, B, and C.

$$A = -4$$

$$B = 2$$

$$C = -1$$

2 Graph points X, Y, and Z on a number line if X has coordinate 4, Y has coordinate 0, and Z has coordinate -3.

- 5 The table shows the average high temperatures for January in selected cities. Order the temperatures from least to greatest.

-3 -2 -1 2 3 4

City	Temperature (°C)
Boston, MA	2
Chicago, IL	-2
Detroit, MI	-1
Juneau, AK	3
New York, NY	4
St. Louis, MO	-3

Absolute Value

Words: The absolute value of a number is the distance it is from 0 on the number line.

Model:

Numbers: $|-4| = 4$, $|4| = 4$

Evaluate each expression.

6 $|-3|$

7 $|-5| - |2|$

f. $|9|$

g. $|-2| + |-6|$

h. $|15| - |-4|$
