 $\triangle JKL$ is a dilation of $\triangle ABC$.

Center of dilation: $(0, 0)$

Scale factor: $\frac{JK}{AB} = \frac{8}{5}$

$$\begin{array}{l}
 S: 8 \quad 8: S \\
 SF = \frac{8}{5} \quad E
 \end{array}$$

onding parts)

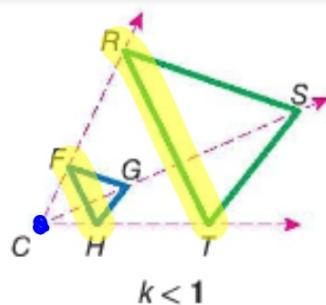

$$\frac{R1}{F1}$$

ConceptSummary Types of Dilations

A dilation with a scale factor greater than 1 produces an **enlargement**, or an image that is larger than the original figure.

Symbols If $k > 1$, the dilation is an enlargement.

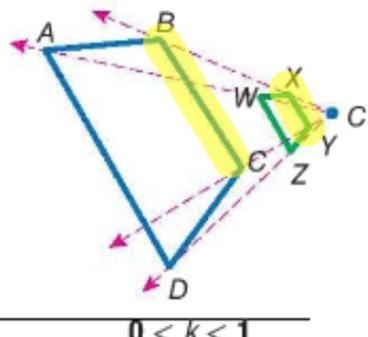

Example $\triangle FGH$ is dilated by a scale factor of 3 to produce $\triangle RST$. Since $3 > 1$, $\triangle RST$ is an enlargement of $\triangle FGH$.

A dilation with a scale factor between 0 and 1 produces a **reduction**, an image that is smaller than the original figure.

Symbols If $0 < k < 1$, the dilation is a reduction.

Example $ABCD$ is dilated by a scale factor of $\frac{1}{4}$ to produce $WXYZ$. Since $0 < \frac{1}{4} < 1$, $WXYZ$ is a reduction of $ABCD$.

What is SF=1?

Example 1 Identify a Dilation and Find Its Scale Factor

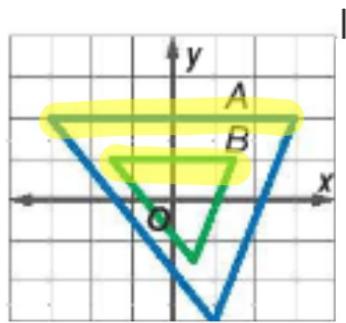

Determine whether the dilation from **A** to **B** is an *enlargement* or a *reduction*. Then find the scale factor of the dilation.

R

$$\frac{6}{3} \frac{3}{6}$$

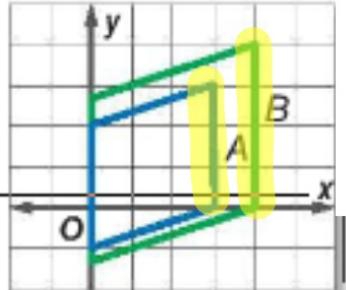

$$\frac{2}{1} \frac{1}{2}$$

$$SF = \frac{1}{2}$$

E

$$\frac{3}{9} \frac{4}{3}$$

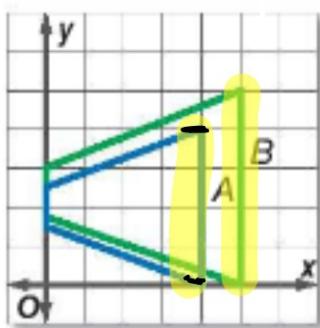

From A to B
E or R?

 **Real-World Example 2** Find and Use a Scale Factor

COLLECTING Refer to the beginning of the lesson. By what percent should Adriana enlarge the ticket stub so that the dimensions of its image are 3 times that of her original? What will be the dimensions of the enlarged image?

(preimage)(SF)=image

$$SF = 3$$

$$19.2 \text{ cm} \times 15 \text{ cm}$$

2. If the resulting ticket stub image was 1.5 centimeters wide by about 1.9 centimeters long instead, what percent did Adriana mistakenly use to dilate the original image? Explain your reasoning.

Example 3 Verify Similarity after a Dilation

Graph the original figure and its dilated image. Then verify that the dilation is a similarity transformation.

a. original: $A(-6, -3), B(3, 3), C(3, -3)$; image: $X(-4, -2), Y(2, 2), Z(2, -2)$

pre

$$\begin{array}{l} \frac{b}{9} \quad \frac{b}{4} \quad \frac{3}{2} \\ \text{---} \\ \frac{2}{3} \end{array}$$

StudyTip

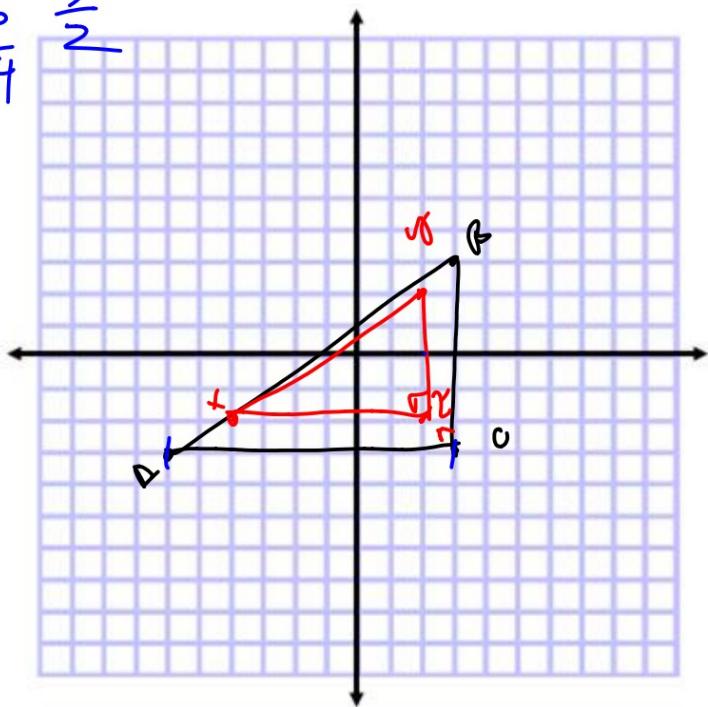

Center of Dilation

Unless otherwise stated, all dilations on the coordinate plane use the origin as their center of dilation.

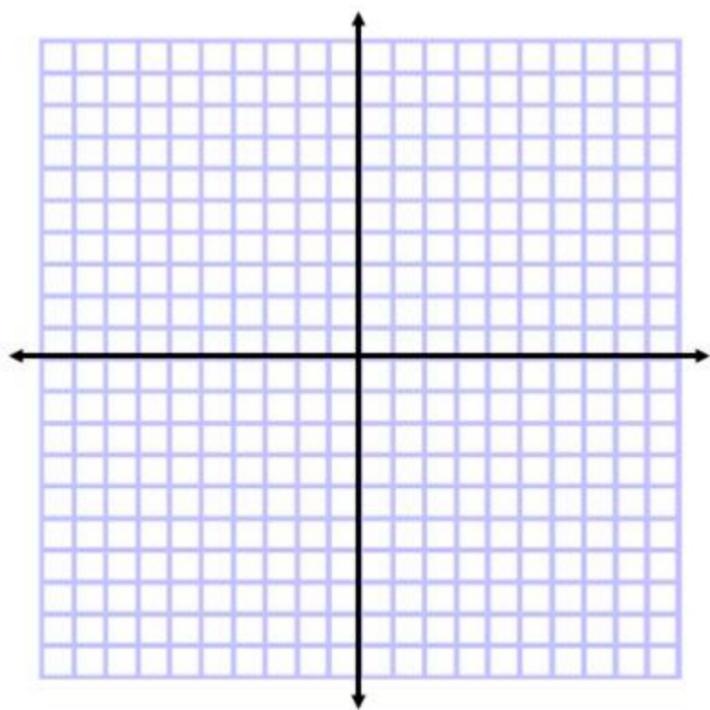

Informally: Does it look like the same shape?

Formally: Are all corresponding sides proportional?

b. original: $J(-6, 4), K(6, 8), L(8, 2), M(-4, -2)$;

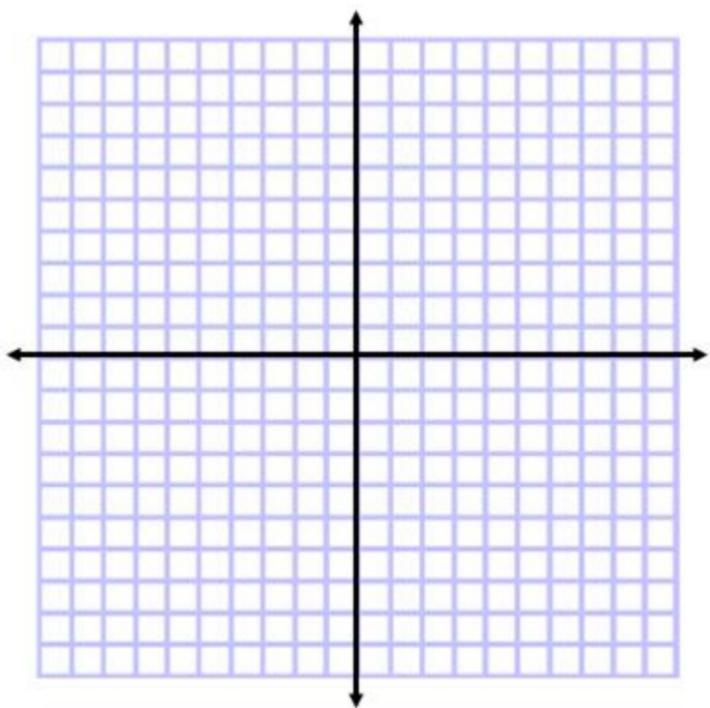

image: $P(-3, 2), Q(3, 4), R(4, 1), S(-2, -1)$

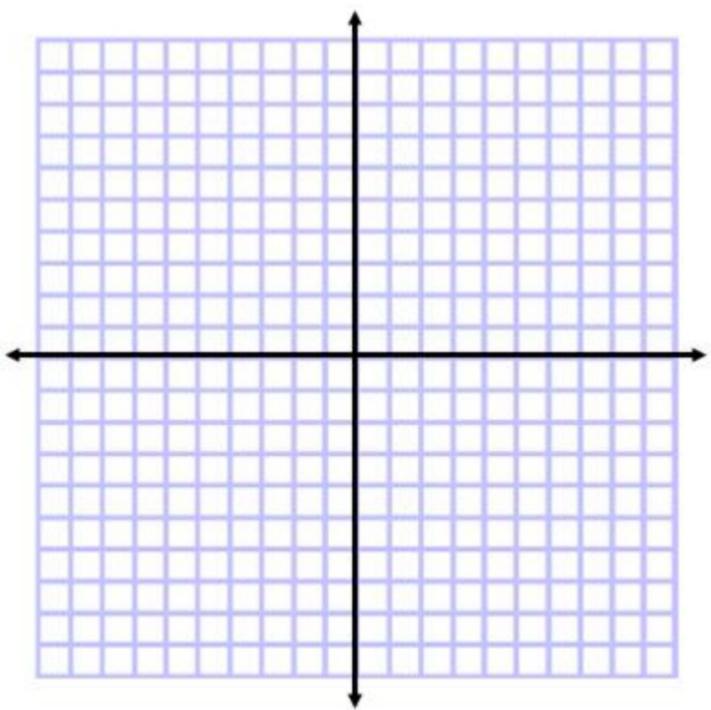

SSS
SAS

► **Guided Practice**

3A. original: $A(2, 3)$, $B(0, 1)$, $C(3, 0)$
image: $D(4, 6)$, $F(0, 2)$, $G(6, 0)$

3B. original: $H(0, 0)$, $J(6, 0)$, $K(6, 4)$, $L(0, 4)$
image: $W(0, 0)$, $X(3, 0)$, $Y(3, 2)$, $Z(0, 2)$
