

Trig 9.1

CCW $(3, 40^\circ)$ ☺

Graph points in polar coordinate form

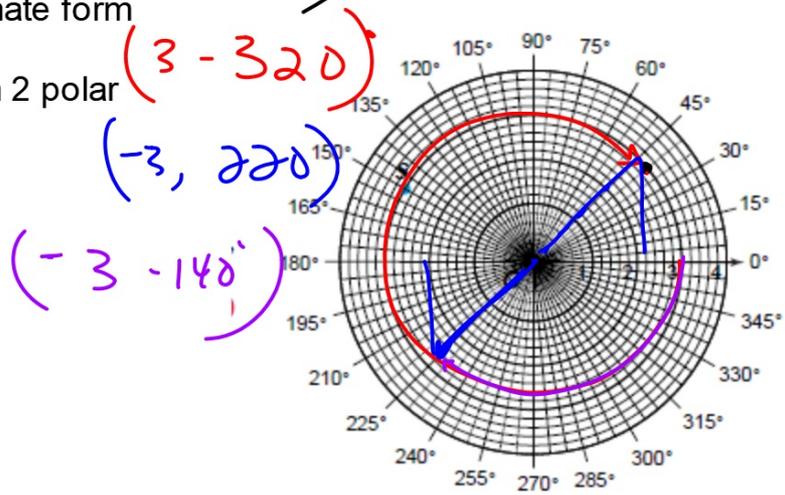

Graph polar equations

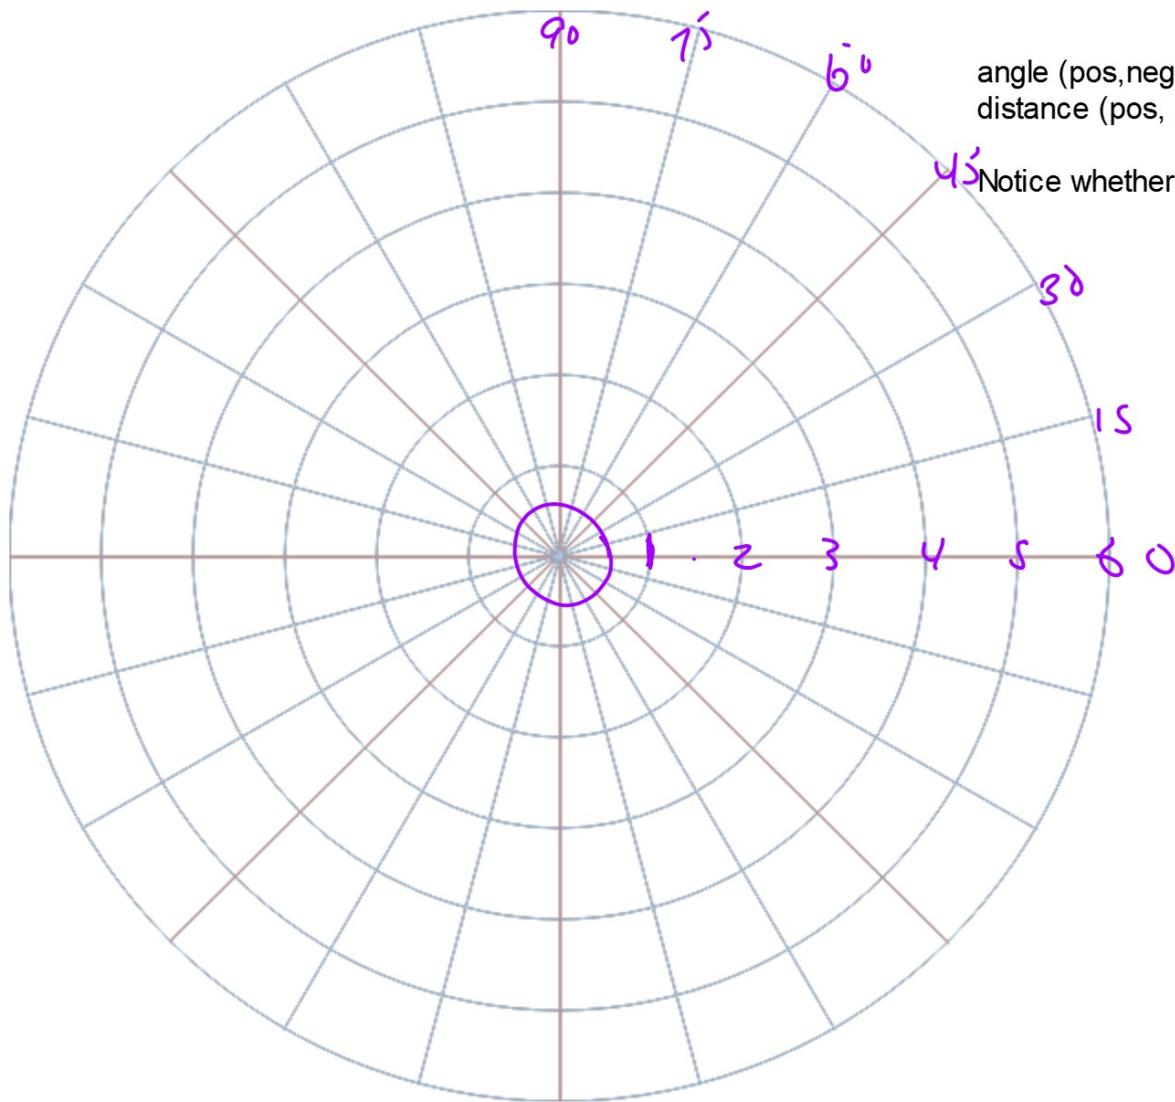

Determine distance between 2 polar coordinates

r (r, θ)

θ

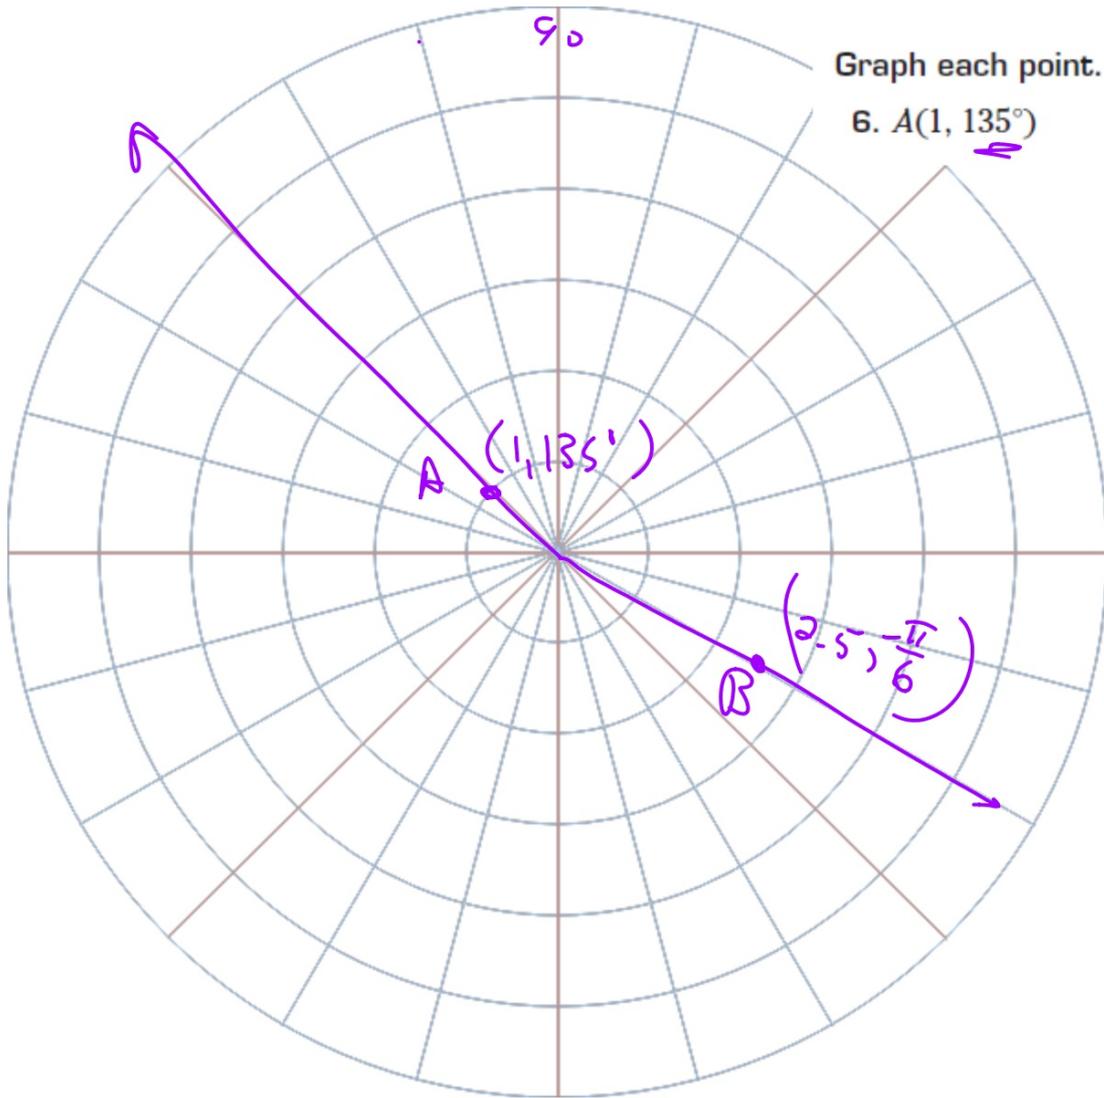

Law of cosines

angle (pos, neg)
distance (pos, neg)

Notice whether $r=1$ or $r=0.5$

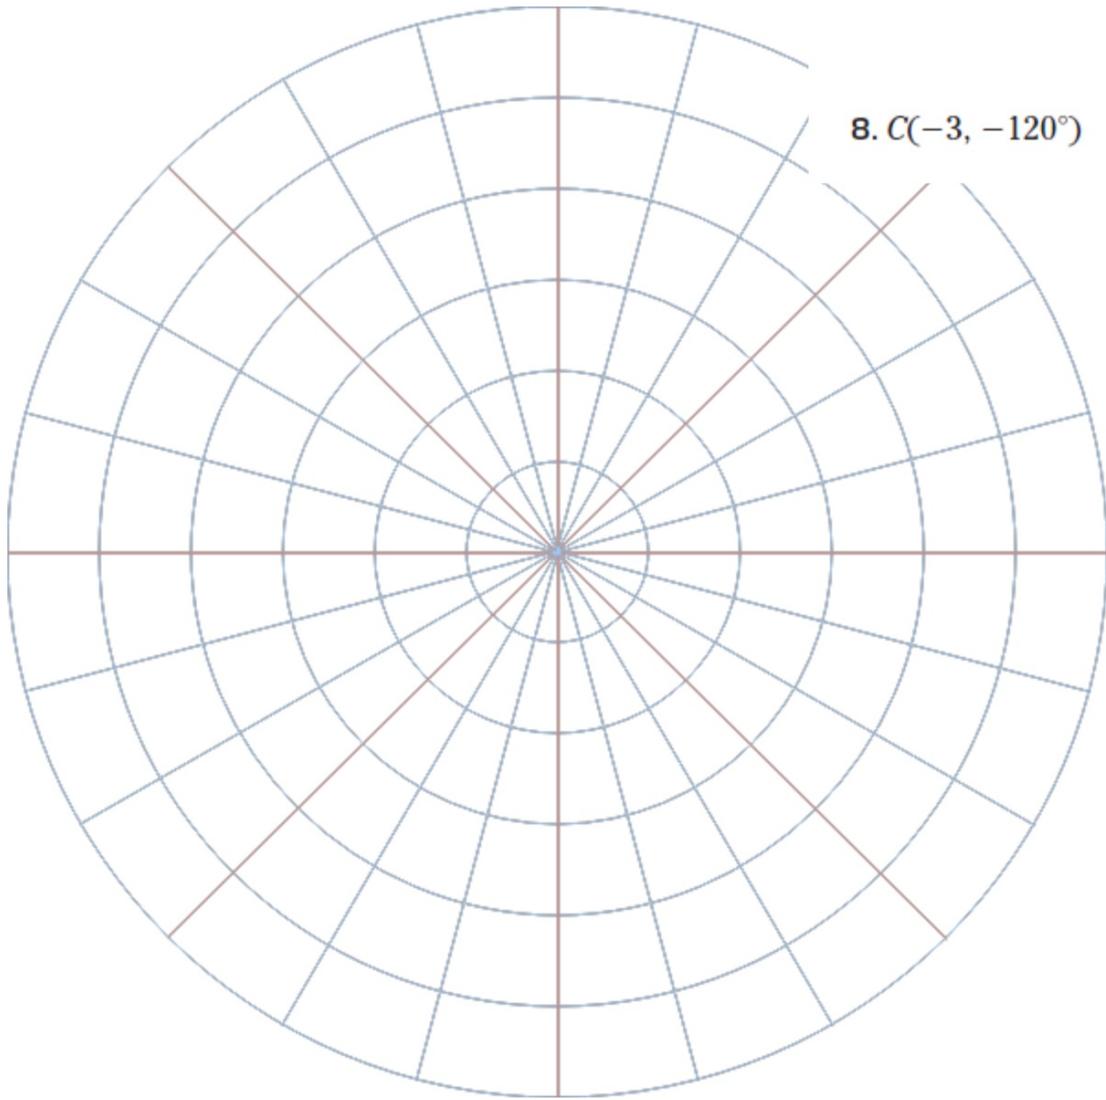

Graph each point.

6. $A(1, 135^\circ)$

7. $B(2.5, -\frac{\pi}{6})$

-30

8. $C(-3, -120^\circ)$

9. $D\left(-2, \frac{13\pi}{6}\right)$

Related to Law of cosines

Distance
Formula in
Polar Plane

If $P_1(r_1, \theta_1)$ and $P_2(r_2, \theta_2)$ are two points in the polar plane, then

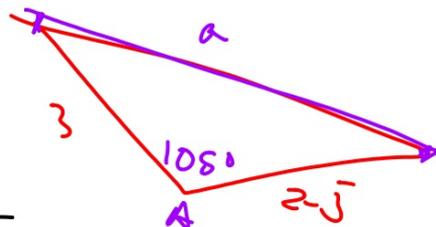

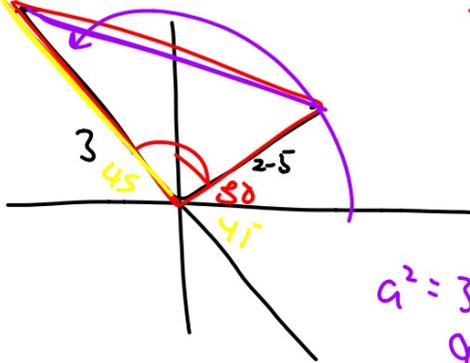

$$P_1P_2 = \sqrt{r_1^2 + r_2^2 - 2r_1r_2 \cos(\theta_2 - \theta_1)}$$

Could memorize... but LOC will do it...

Law of cosines

$$(2.5, 30^\circ) \quad (-3, -45^\circ)$$

14. Find the distance between $P_1\left(2.5, \frac{\pi}{6}\right)$ and $P_2\left(-3, -\frac{\pi}{4}\right)$ on the polar plane.

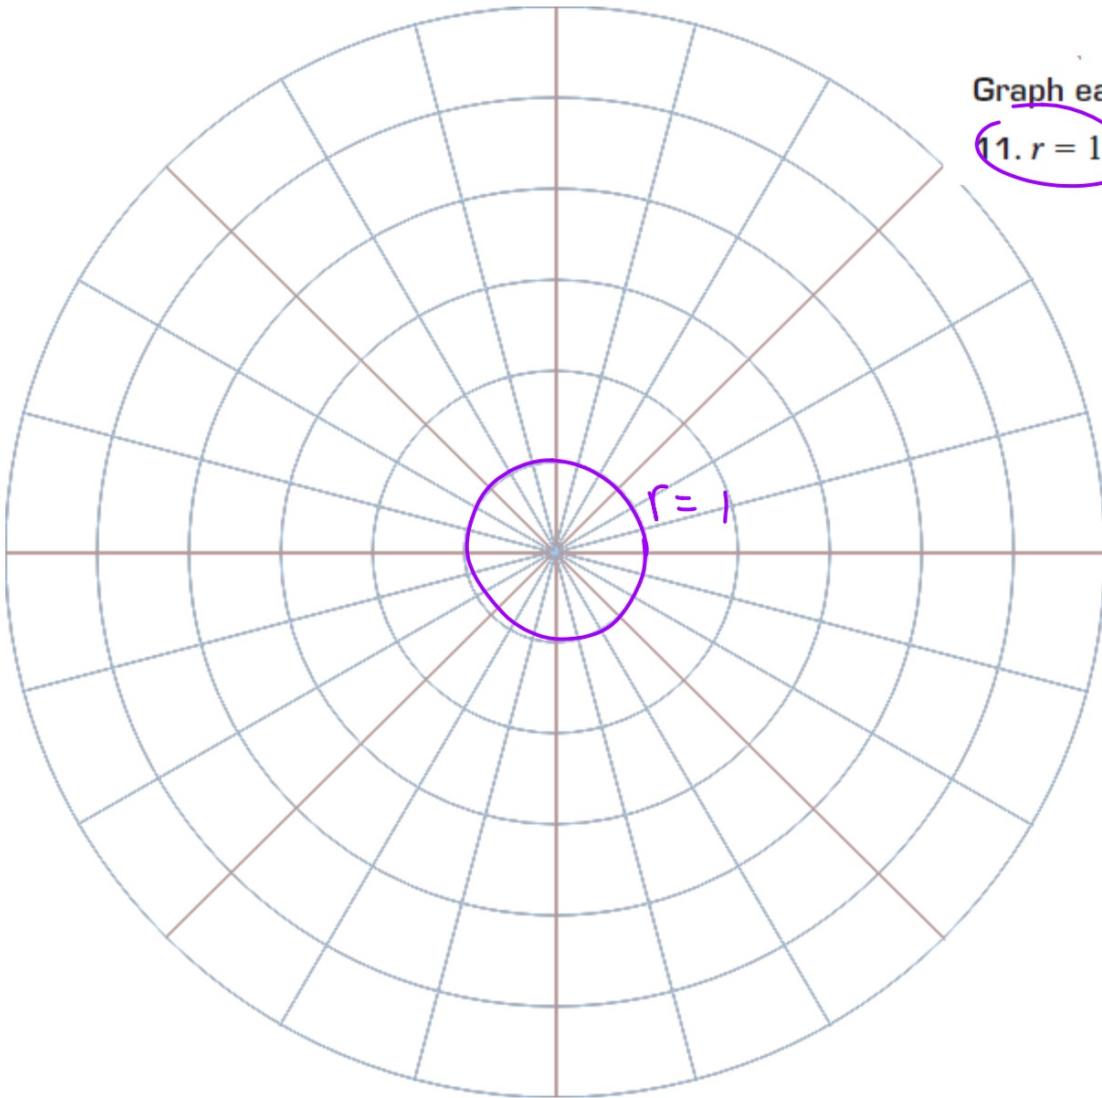

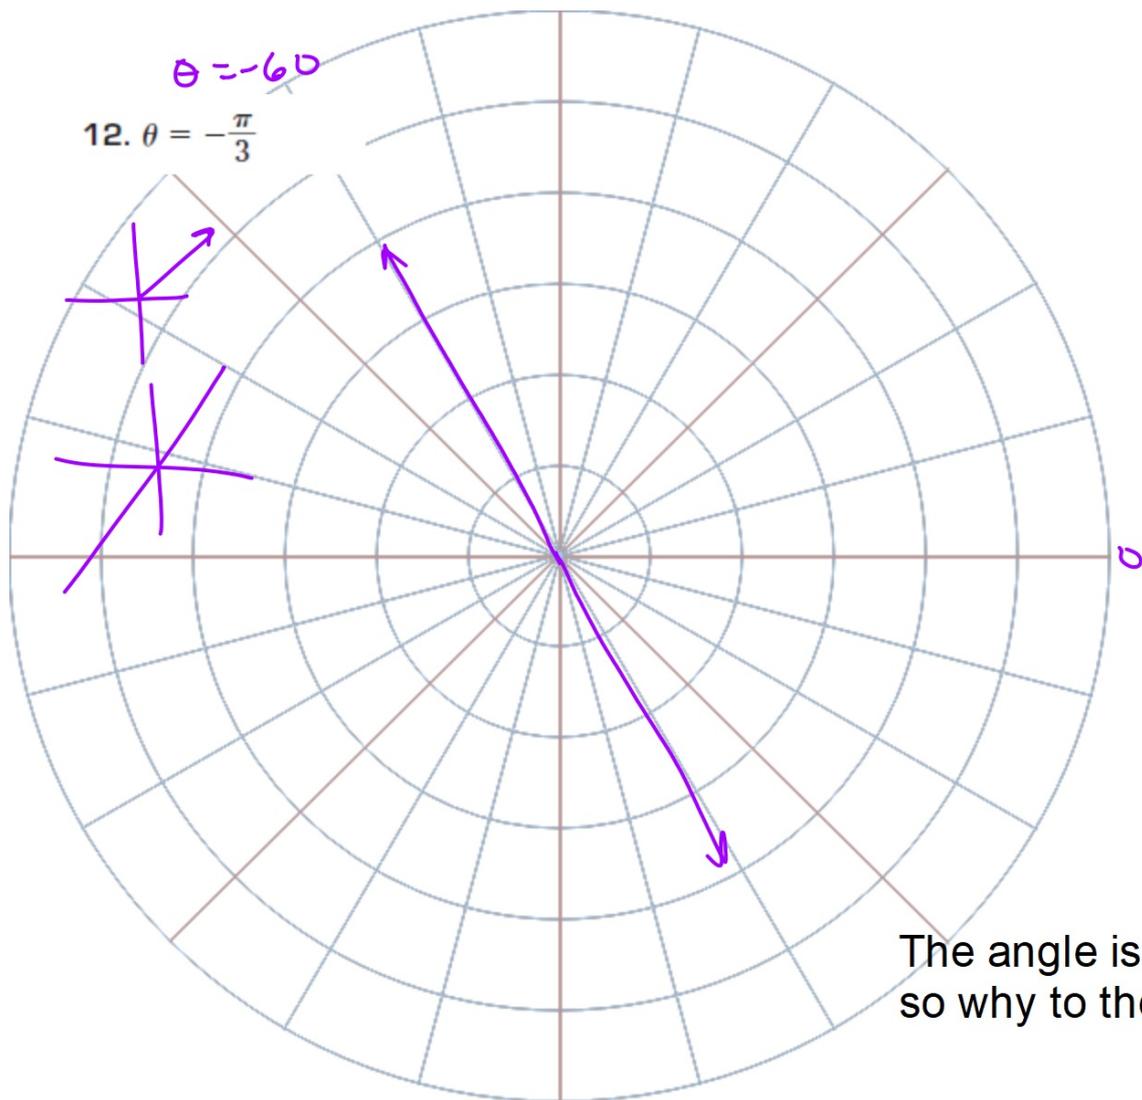

$$\begin{aligned} a^2 &= 3^2 + 2.5^2 - (2 \cdot 3 \cdot 2.5 \cos 105^\circ) \\ &= 9 + 6.25 - (-3.8825) \\ &= 19.1325 \end{aligned}$$

20.1

Graph each polar equation.

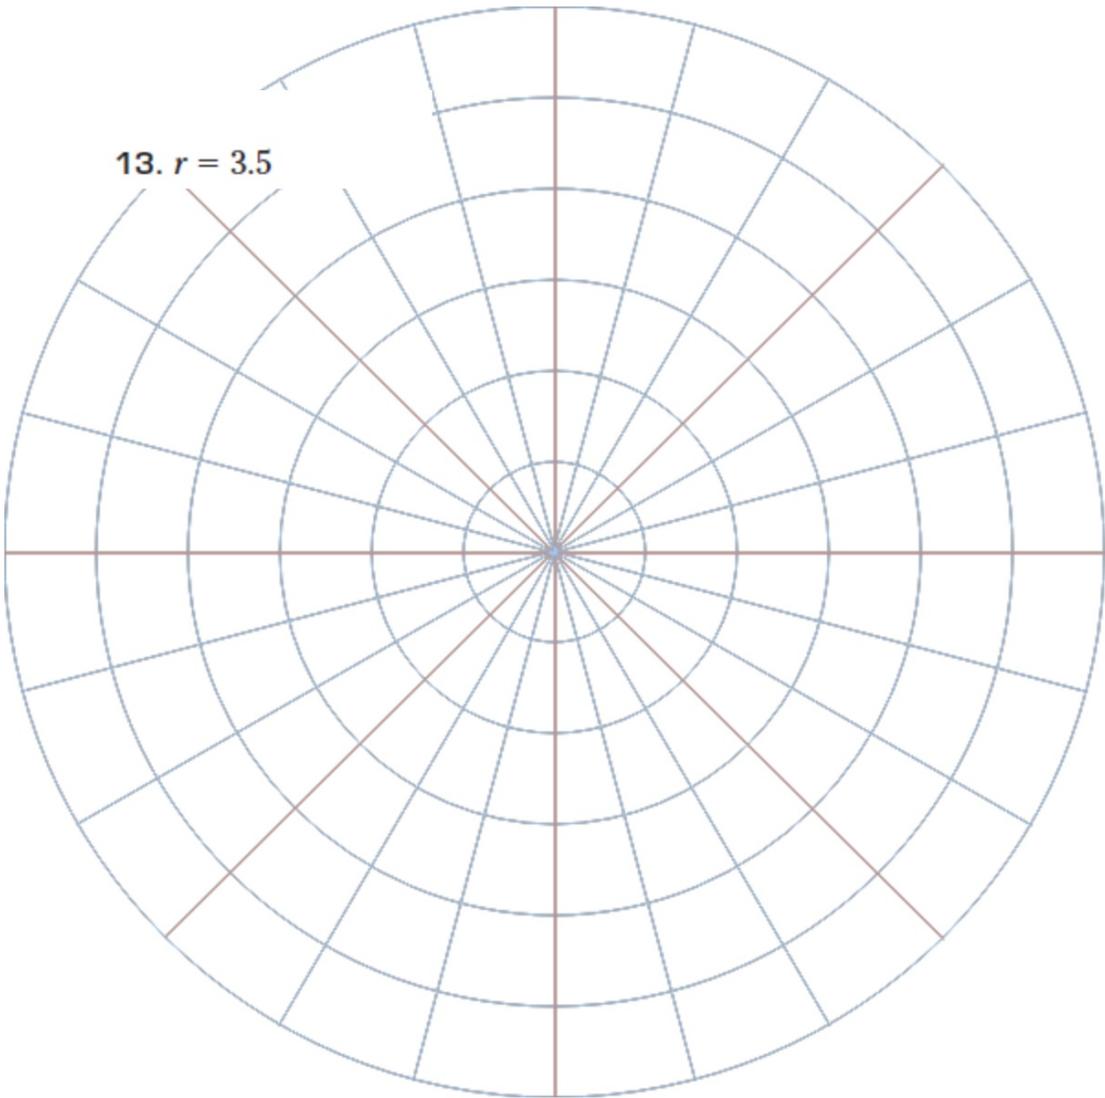

11. $r = 1$

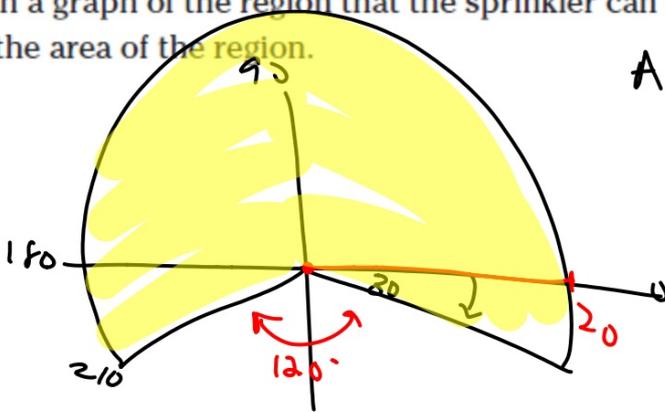

The angle is actually a ray...
so why do they extend it?

13. $r = 3.5$

15. **Gardening** A lawn sprinkler can cover the part of a circular region determined by the polar inequalities $-30^\circ \leq \theta \leq 210^\circ$ and $0 \leq r \leq 20$, where r is measured in feet.

- Sketch a graph of the region that the sprinkler can cover.
- Find the area of the region.

$$A = \left(\frac{240}{360} \right) \pi \cdot 20^2$$

$$837.76 \text{ ft}^2$$

$$\log_{10} 100 = 2$$

$$10^2 = 100$$

$$(x+3)(x-2) = 3$$

$$\cancel{\log_{10}(x+3) + \log_{10}(x-2)} = \cancel{\log_{10} 3}$$

$$\log_{10}(x+3)(x-2) = 3$$

$$1000 = x^2 + x - 6$$
